DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6 and 10-13, drawn to a steel cord.

Group II, claims 7-9, drawn to a method of making said steel cord.

Group III, claim 14, drawn to the use of said steel cord.

The common technical feature of Groups I, II and III is the steel cord. The limitation that differentiates Applicants' claimed cord over the prior art is the test involving twenty load cycles that results in a structural elongation below 0.09% at low loads. However, EP 0960749 discloses a steel cord having an elongation of 0.054% in a low load range (Table 1). Although the disclosure is silent with regard to taking such a measurement after twenty load cycles, the number is "typical" as Applicants disclose (pg 6 ln 29-31). Also, one of ordinary skill in the art would recognize the need to repeat such a test to ensure a cord is settled. As such, the common technical feature of Groups I-III is known in the art.
